HOMEMADE TEMPLATE

1. Begin by printing out the template. For smaller sizes, simply use the Scale option to scale down the template in the Print Dialog box.
2. Cut out both sizes of the template and trace two pairs of the template over foam board or cardboard. Then, cut out both templates, be sure there are a pair of each size.
3. To construct a pom pom, simply choose a pair of the same size template and place them together with the openings aligned.
4. Begin to wrap yarn all the way around the pair, leaving about 1/4 inch of space away from the opening. Once reaching the other end of the opening, leave the same amount of space and wrap a second layer of yarn back around the template. Tightly wrap at least 4 layers of yarn, then cut the end.
5. Carefully use a pair of scissors to cut the yarn around the circumference of the circle. Hold the opening of the template to stop any stray pieces from falling.
6. Cut an extra piece of yarn, then slide it between the two sides of the template and tightly tie a double knot around the center of the cut yarn.
7. Gently slide the template sides off one at a time. Evenly spread out the pom pom and trim any excess pieces of yarn.
