HOMEMADE MICKEY EAR TEMPLATE

1. Begin by printing out the template. There are three available sizes for large, medium, and small ornament sizes.
2. Cut out the size of the template you need and trace two pairs of the template over cardstock paper or felt. Then, cut out both templates.
3. Once the two Mickey ears are cut out, notice the two flaps you have at the bottom of the circles. These two flaps will be the part you add glue to.
4. Do not glue both the flaps in the same direction. They should be glued opposite each other. This will help the Mickey ear to be straight instead of leaning.

Hint: if you are using cardstock then use a tacky glue, but if you are using felt then use hot glue.
