MATERIALS

- Pollinator-friendly plants or seeds from a local nursery or online store (native plants are best, if available)
- Potting soil
- A pot or container with drainage
- A trowel (or you can use your hands)
- Gloves (optional)

INSTRUCTIONS

Step 1: Fill your pot with soil.

Step 2: Remove the plant/seeds from the container.

Step 3: Spread soil around to make room for the plant.

Step 4: Fill, Thrill, Spill. Fill the pot with plants. Choose lots of thrilling colors. And let the plants spill over the pot. Remember to plant in height order — tallest first, and in the back.

Step 5: Enjoy your new mini garden and greet your new pollinator friends.
