TRANSFER FROM TEMPLATES

For a step-by-step guide with photos, see the previous blog post, [Disney Parks DIY: Make-Your-Own Mickey Mugs](#).

1. Begin by printing out the template. For smaller sizes, simply use the Scale option to scale down the template in the Print Dialog box.
2. Cut out all of the templates.
3. Completely cover the entire back of the template piece with a thick, dark layer of pencil.
4. Arrange the template over your rock, pencil side down. Secure with tape.
5. Firmly trace the template with a pen. Peel a small corner of the template off to make sure the pencil is transferring to the rock.
6. If the design does not transfer, remove the template and layer over the back of the template with a softer pencil. Then repeat step 5.
7. Once the template is transferred, remove the paper and tape and paint.
8. **TIP:** If painting multiple colors, save the template, coat once again with pencil and re-apply the template over each coat of paint to keep the details visible.

Paint two smaller rocks black for Mickey's ears.

Paint all green first before transferring the template.

Fill Tinkerbell's silhouette with glitter for some sparkle.
