CASTLE OF MAGICAL DREAMS

Sheet Numbers: A, B, C, D, E, F, G, H, I, J

HISTORY

Hong Kong Disneyland Park opened its gates on September 12, 2005.

Now in its 15th year, the park celebrates the opening of its newly imagined Castle of Magical Dreams.

The castle's design is inspired by the stories from some of the most iconic Disney Princesses. The re-imagined castle will pay tribute to each of these Disney heroines for pursuing their dreams. The architectural elements embrace the characteristics of each heroine through the interpretation of colors, icons, patterns and cultural features, with uniquely designed towers, turrets and spires dedicated to their respective stories. Guests will be able to recognize the individual elements inspired by their favorite Disney heroines, celebrating a sense of diversity, inclusion and unity.

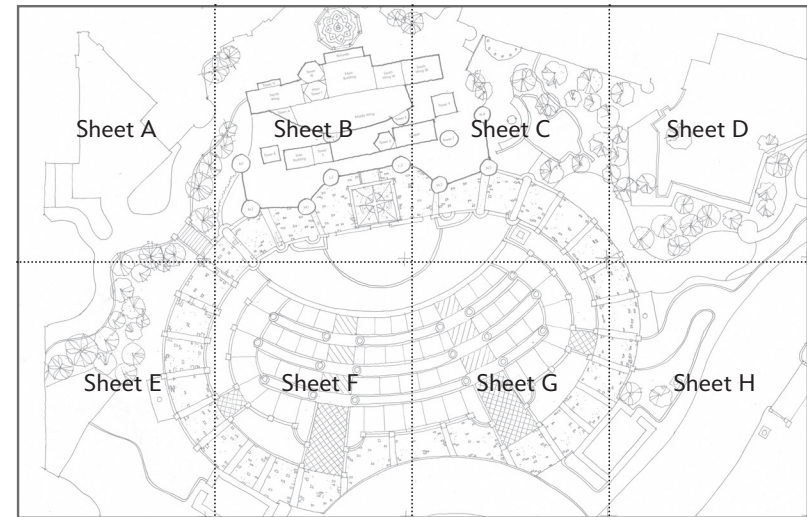

MATERIALS

GUIDE

.....	Valley fold, fold in front
-----	Mountain fold, fold behind
————	Cut
.....	X-ray or guide line.

INSTRUCTIONS - SITE PLAN

1. Color the sheets as you like.
2. Lay out Sheets A through H according to the diagram above. You can tape them together or keep them separate for easy storage. We recommend taping Sheet B and Sheet C together, as this will be very important to reference when constructing the Castle.
3. For the Foliage (Sheet I): Cut along the solid line, fold according to the guide, and glue the tops together. You can place these anywhere around the Castle.
4. For the Carriage (Sheet J): Cut along the solid lines and where indicated. The strip will fold into a seat. Carefully cut the tabs between the horses and carriage and glue to the inside of the carriage to secure them. You can use toothpicks to make the wheels movable or glue the wheels straight on.

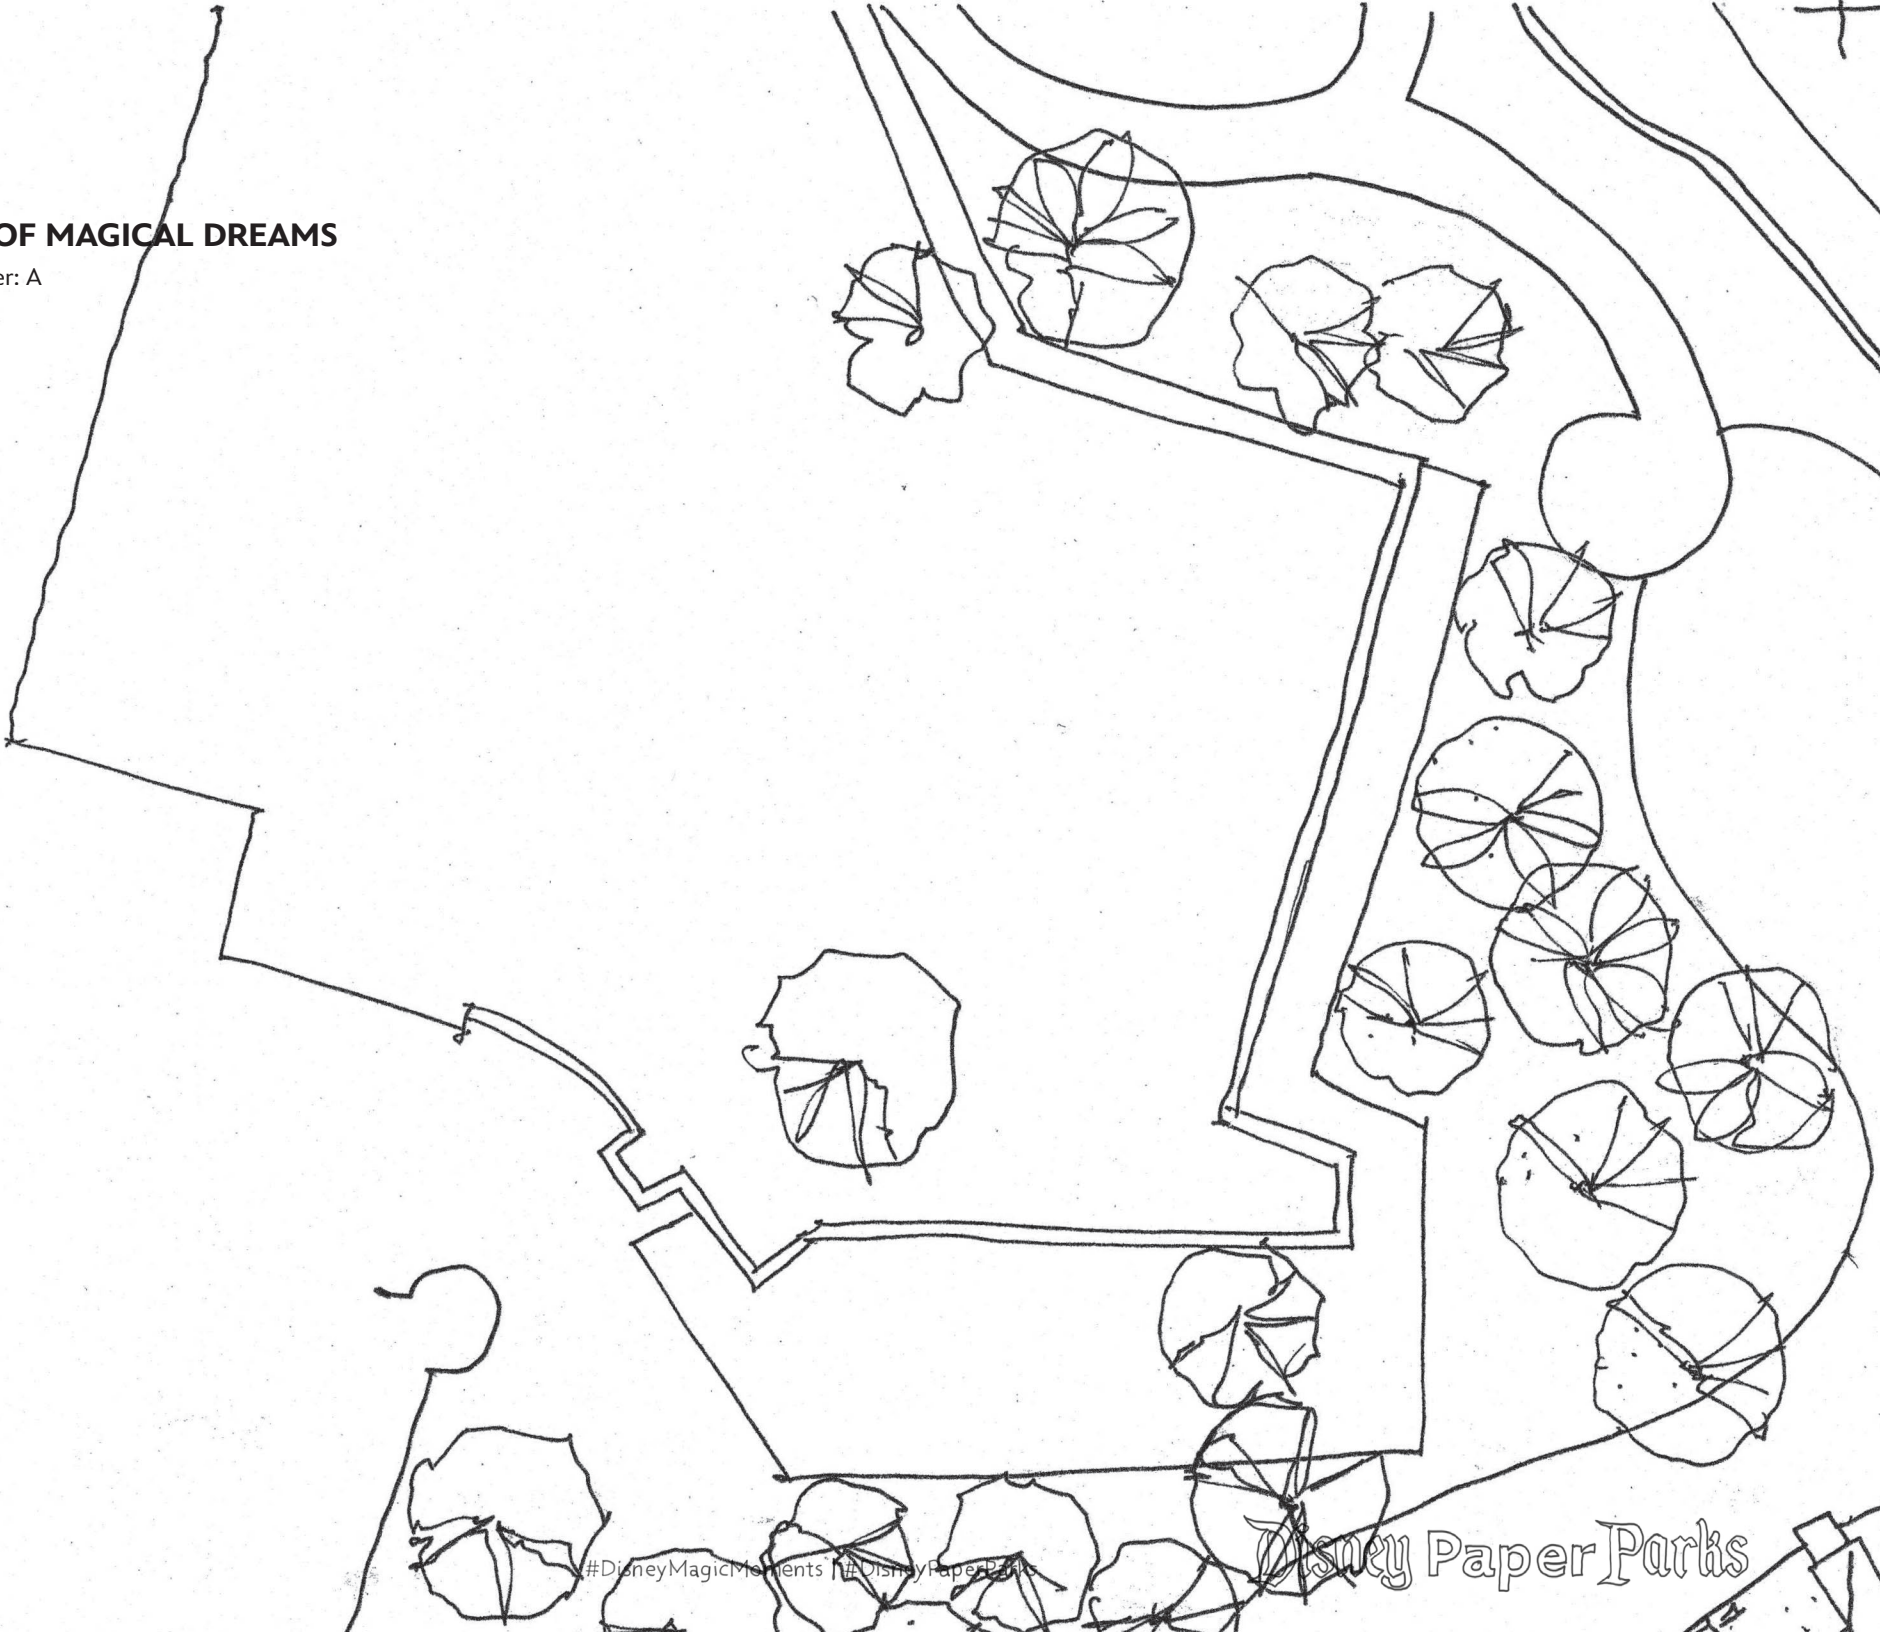

Please Note: When cutting with scissors and working with any of the materials listed above, adult participation and supervision is recommended.

CASTLE OF MAGICAL DREAMS

Sheet Numbers: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19

INSTRUCTIONS

1. Color the sheets as you like.
2. We recommend you build all of the individual modules 1-4 before gluing them together. Since there are many parts, it will be easier to cut the pieces on each sheet as you move on.
3. Sheets 1 - 2: Build the Central Building, as it acts as the core once other completed modules are glued. Cut out windows A and B and glue onto the facade.
4. Sheets 3 - 4: Build the Main Tower 1. This is the most complicated, so once you complete, everything else will look easy. This is glued to the center of the left side of the Central Building as indicated in the grey shading. Refer to Diagram 1 for guidance.
5. Sheets 5 - 6: Build the South Wing. This will be glued to the center of the right side Central Building.
6. Sheets 7 - 8: Build the North Wing Spacer and the North Wing. These both should be the same width. Glue the North Wing Spacer to the center of the left side of the Central Building & directly under the Main Tower #1. Glue the North Wing to the North Wing Spacer (in the same plane).

*NOTE: When all of these modules are glued together, they should all line up in the same plane in the front, forming the core of the Castle in which other components are glued or set in front.

7. Sheets 9 - 10: Now build the Middle Wing façade and glue on the half round Tower #2 and #3. Tower #4 is then glued to wrap around the left corner. Glue the right tab to the front of Tower #2 as indicated with the glue line and glue the left tab to the left side wall of the Middle Wing as indicated with grey shading.

*NOTE: This all is now glued to the face of the core buildings from pages 1 - 8.

CASTLE OF MAGICAL DREAMS

Sheet Numbers: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19

INSTRUCTIONS

Model view from back

8. Sheets 11 - 12: These are the walls to make the original castle.
 - First build the Tower #5 module. This will consist of a square tower on the left and the castle center & chapel flat façade on the right.
 - Now build Side Building and glue to the left side of Tower #5 as indicated with grey shading.
 - Then build Tower #6 (set aside for Sheet 13). See Diagram 2 for guidance.
9. Sheet 13: Build the Chapel and glue behind the chapel façade built on Sheet 12. Now glue Tower #6 to the back of the castle center portion of the façade (touching the side of the Chapel).
10. Glue this collection of modules to the Middle Wing as indicated by the glue lines on Tower #3 and Tower #4.
11. Sheet 14: Continue to build Tower #7, Tower #8 and Tower #9. Glue tower #7 to glue line indicated on Tower #9. See Diagrams 3 and 4 for guidance. These are free standing towers – see plan for placement.
12. Sheet 15: Construct the Castle Walls gluing tabs, creating folds and curves (hint: use a pen to roll paper around to form curved walls).
13. Sheet 16 - 17: Create all of the cylindric Towers and glue to the back of corresponding curved portions of the Castle Wall built on page 8. See plan for placement. Refer to Diagram 5 for construction guidance.
14. Sheets 18 - 19: Refer to Diagram 6.
 - Build the Rotunda with the Window Feature and glue to the back of the Central Building.
 - To the left, glue the Colonnade façade to the back of the South Wing starting from the corner. Glue the turret to the corner.
 - Construct Tower #10 and glue to the back of Main Tower #1 to the right of the Rotunda.
 - Next glue on the Tudor Façade to the back of the North Wing and to the right of Tower #10. Then build Tower #11 and glue next to the Tudor Façade on the back of the North Wing.
15. Congratulations! You've finished making the Castle of Magical Dreams!
