

# Mickey's Birthday

## Cake Pop

### You will need:

### Let's get started!

*Parent supervision required. All cooking, baking and cutting should be done by an adult.*

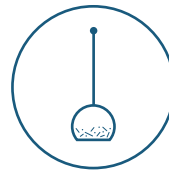

Melt  $\frac{1}{2}$  cup of the candy melts according to package instructions.

Make your favorite cake pop recipe using the cake pop kit.

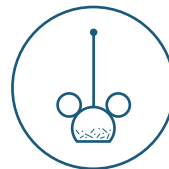

Place plastic quart-size freezer bag into small cup, folding back first few inches of bag over top of cup. Spoon melted chocolate into bag, gently shaking bag to move chocolate to bottom of bag.

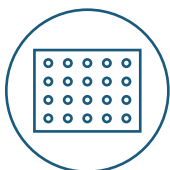

Melt the remaining candy melts and dip each cake pop until fully covered. Immediately dip the cake pop halfway into a small bowl filled with sprinkles.

Once filled, lift bag from cup and squeeze out excess air from bag and seal bag with a few twists to top of bag. Cut bottom corner of bag with scissors.

When chocolate around the cake pops is about to harden, place two chocolate disks on the sides to form Mickey ears.

Pipe the chocolate into quarter-sized round disks onto a sheet of wax paper to make Mickey ears. Allow to harden. Set aside.
